

Try Figure Out what's wrong with notion-app+notion-enhancer

2020-11-12T10:51:01-05:00

Problem

Cannot tweak my notion-app color with notion-enhancer

Debugging

- Potential problem: Electron?
- try installing notion using this <https://github.com/jaredallard/notion-app> instead of the AUR package.
- potential problem: notion-enhancer does not have permission to modify notion-app color scheme

fixed

- so the second problem is actually the reason that we see no change in the color scheme
- For my case, i reinstall notion-enhancer using npm install, then change folder permission

```
sudo chmod -R a+wr /usr/bin/notion-app  
sudo chmod -R a+wr /opt/notion-app/app
```
